

Geomicrobiology and hydrogeochemistry in high mountain habitats and in cold water mineral springs

**A 3-day field trip to geomicrobiologically and geochemically interesting
ecosystems in the Swiss Alps**

**for participants of the Geosciences & Geoecology Program
at the Eberhard-Karls-University Tübingen and guests**

Tuesday, September 1 to Thursday, September 3, 2009

Guided by
Andreas Kappler, Eberhard-Karls-University, Tübingen and
Kurt Hanselmann, swiss i-r+t, Zürich

**Geomicrobiology, Geology, Bio-geo-chemical cycles,
Hydrobiochemistry, High altitude research, Hydrology, Tectonics**

Fe geomicrobiology in the former iron mine Gonzen,
Fe, S and C cycling in the Jöri lake catchment and
low temperature geochemistry in the mineral springs
of the Lower Engadine Window and the Albula valley region /GR, Switzerland

Enrolment: **before June 15**, with Andreas Kappler, Eberhard-Karls-University Tübingen,
andreas.kappler@uni-tuebingen.de, phone ++49 70 71 - 29 74 992
